**Miles  
Nelson®**

**PROUDLY  
NZ OWNED  
& OPERATED**

**Founded in 1928, Miles Nelson  
is one of New Zealand's most  
trusted hardware companies  
and is proud to be 100%  
privately New Zealand  
owned and operated.**

Based in Auckland, Miles Nelson distributes nationwide and internationally, and is well known for its quality product range, innovative design and commitment to customer service.

Miles Nelson's long history as a manufacturer, coupled with in house technical expertise and custom designed proprietary products means that our range is specifically designed and manufactured to suit the New Zealand market.

The use of quality materials coupled with a range of high quality finishes and a suite of styles makes the Miles Nelson range the ideal choice for commercial and residential projects.

To locate your nearest stockist phone **0800 6635 766** or email **[info@milesnelson.co.nz](mailto:info@milesnelson.co.nz)**

# Things to Consider

## Types of Door Functions

### Entrance

Exterior doors – internal locking with turn or button, key access from outside.

### Deadbolt

Single cylinder key and turn or double cylinder key locking from both sides of the door.

### Passage

For general interior or hallway doors (non-locking operation).

### Privacy

For bedroom or bathroom doors (internal locking, emergency access from outside).

### Dummy

For wardrobe and cupboard doors (fixed lever or knob).

## Replacing Hardware

If you are looking to replace hardware on an existing door, or a door with predrilled holes, you'll need to measure the diameter of the holes and make sure the hardware face plate or trim will cover the openings.

Measure the backset: the distance from the door edge to the centre of the handle or key barrel and the width of the door stile: which is the vertical panel at the edge of a frame and glass panel door, where the door hardware is installed.

The width of the door stile is important when selecting a lock or handle with the correct backset, particularly if the door is panelled as this reduces the available area to install hardware.

Please refer to the graphic below:

# Things to Consider

## Thickness of the Door

**Most interior doors range from 33-40mm thick and an exterior door is 40-45mm thick.**

If your door's thickness differs from these standards, you may need to purchase conversion components to ensure the hardware will work with your door.

If you're purchasing a lockset with a lever handle that is left or right handed (i.e. it will only work on either a left or right opening door), you may need to know the direction your door swings (called the door handing or hand-of-door) so you don't end up with levers that are upside down or on the wrong side of the door.

For ease of use Miles Nelson recently launched a range of lever handles and deadbolts called the S range which are non-handed. They also feature a unique interlocking mechanism for easy installation and to avoid the handles drooping after installation.

## Door Handing

**Please note that some products are handed to suit right or left hand opening doors.**

Please refer to the diagrams below:

**RIGHT HAND**  
Hinges on left,  
opens inward

**LEFT HAND**  
Hinges on right,  
opens inward

**RIGHT HANDED  
HANDLE**

**LEFT HANDED  
HANDLE**

Stand on the secure side of the door (where you would insert your key, or an unlocking tool if it was a privacy set). For interior doors you should stand on the side that you would enter from i.e. In the hall if opening a hall cupboard door, in the bedroom if the door opens to an ensuite, in the hall if opening into a living room.

For pairs or double doors, determine the hand of the active leaf. The active leaf is typically the door with the lockset. Both leaves may be active.

## Window Types and Fittings

It is important to note the type of window you are purchasing the fitting for, as there are several types of window which use different stays.

Please refer to the diagram below to check your window type before selecting the appropriate stay or lock in the window fittings section:

**AWNING WINDOW**

**CASEMENT WINDOW**

**SLIDING WINDOW**

**SASH WINDOW**

## Security

If you are choosing the hardware for an exterior door, consider how much security you need or want.

Double cylinder locks are usually the most secure, particularly if you have a glass entry door. Some people like to install a double-cylinder deadbolt; with this setup, an intruder can't unlock the door from the inside even if they break the glass. This also prevents thieves from carrying large items out of a property through the front or back door if they do gain access through a window.

It is important to remember lockable patio bolts on sliding doors for this reason also. However, you'll only want to use a double-cylinder lock if you have another easily accessible fire exit or keep the key in a readily accessible place, to enable occupants to escape the house in an emergency.

# Miles Nelson

## Common Finishes Glossary

Door hardware and window fittings are available in a variety of styles and finishes so you can choose a style that complements your home, as well as the finishes on other hardware and light fixtures.

When choosing a finish, keep in mind that oil-rubbed bronze, antique bronze and copper are all living finishes that will change over time. Polished brass can tarnish if used outside, to avoid tarnishing it is best to keep it clean and wax it lightly with an appropriate product. Another exterior option to consider is stainless steel.

There are two standard grades of stainless steel: 304 for exterior use in non-coastal areas and 316 for exterior use in properties within 500m of the ocean.

This is especially important to consider in New Zealand with our close proximity to the ocean. Stainless steel can also be cleaned using an appropriate cleaner.

For a clean, contemporary look we also offer the recently launched range of entry and internal door hardware and door stops in a matt black finish.

Please refer to the common finishes glossary below and listed with each product when making your selection.

Chrome Plate	CP
Satin Chrome	SC
Bright Chrome	BC
Brass Finish	BR
Polished Solid Brass	PB
Bright Goldtone	BG
Stainless Steel	SS
Polished Stainless Steel	PS
Satin Nickel	SN
Brushed Nickel	BN

Florentine Bronze	FB
Powder Coat White	PW
Matt Black	MB
Black Chrome	BC
Satin Anodised	SA
Uncoated Raw Material	RW
Satin Graphite	SG
Copper	CU
Gold	GD

# Warranty information

## **3** YEAR MILES NELSON WARRANTY

**Products covered: Electronic entry and deadbolt. MN9000L, MN9000R, MN9001L and MN9001R.**

All electrical and electronic components used in Miles Nelson range of products excluding batteries are guaranteed for a period of 3 years from the date of proof of purchase, unless otherwise stated.

Miles Nelson assumes no liability under the warranty for the following:

1. Improper installation or failure to follow fitting instructions.
2. Failure due to improper maintenance.
3. Fair wear and tear.
4. Indirect or consequential loss or damage.
5. Cost of removal and / or replacement.
6. Cost of freight and / or travelling time.
7. Damage to or deterioration of plated finishes (soft finishes) or finishes exposed to a corrosive environment. As deterioration is possible under some environmental conditions.
8. Any modification or repairs to a product, as supplied unless authorised by Miles Nelson.
9. Use of replacement parts other than authorised parts.
10. Malfunction or failure of the product due to the use of non-genuine Miles Nelson parts.

## **5** YEAR MILES NELSON WARRANTY

**Products covered: All General Hardware Products including Bannister Brackets, Bathroom Fittings, Cabinet Hardware & Handles, Cabin Hooks, Door Fittings, Door Stops, Hinges, Hooks, Kickplates, Push Plates, Grab Rails, Letterbox Letters & Numbers, Neck Bolts, Security Fittings (excluding the Patio Bolts, Mini Bolts, Restrictor Stays and Security Window Stays) and Socket Bolts.**

These products are warranted to be free from mechanical and workmanship defects for 5 years from the original date of purchase.

If a mechanical defect occurs simply return the product together with proof of purchase to point of purchase for replacement.

Over time the surface may deteriorate if exposed to adverse atmospheric conditions caused by sea, air and weather. Finish deterioration caused by exposure to adverse atmospheric conditions or occurring from the use of paints, solvents, acid cleaners or scratching from keys is not considered a defect in the finish and is not covered by the warranty conditions.

Likewise the warranty does not cover damage caused by incorrect installation, accident, neglect or other factors over which Miles Nelson have no control and as such Miles Nelson shall not be held liable for any losses or expenses such as loss of use, damage to property or consequential damages or expenses.

## **10** YEAR MILES NELSON WARRANTY

**Products covered: Miles Nelson Commercial Door Furniture, Miles Nelson Commercial Door Closers, Door Handles & Pulls, Restrictor Stays, Security Window Stays, Patio Bolts and Mini Bolts.**

These products are warranted to be free from workmanship defects for 10 years from the original date of purchase. If a defect is detected simply return the product together with proof of purchase to the supplier for replacement. Products are designed for interior residential applications, unless otherwise stated.

Over time the surface may deteriorate if exposed to adverse atmospheric conditions caused by sea, air and weather. Finish deterioration caused by exposure to adverse atmospheric conditions or occurring from the use of ammoniated detergents, metal polishes, solvents, corrosive environments or other abrasive agents or scratching from keys is not considered a defect in the finish and as such is not covered by the warranty.

Likewise, the warranty does not cover damage caused by incorrect installation, accident, neglect or other factors over which Miles Nelson have no control and as such Miles Nelson shall not be held liable for any losses or expenses such as loss of use, damage to property or consequential damages or expenses.

## **10** YEAR MECHANICAL WARRANTY

**Products covered: S Range and Milano door handles.**

These products are warranted to be free from mechanical and workmanship defects for 10 years from the original date of purchase. If a mechanical defect occurs simply return the product together with proof of purchase to point of purchase for replacement.

This warranty does not cover the finish, defects or damage arising from improper installation, incorrect product application, improper maintenance, storage, shipping, handling or normal wear and tear or products used in commercial applications as "Commercial" is defined as any application other than those found on private residences.

# Warranty information

Miles Nelson Manufacturing Ltd guarantees its products against defects in workmanship and materials. Should the product develop fault within its normal working life, Miles Nelson will repair or replace product of the same or equivalent product free of charge. Miles Nelson Manufacturing Ltd assumes no liability under this guarantee for the following.

1. Incorrect installation or failure to follow instructions.
2. Failure through improper maintenance or fair wear and tear.
3. Loss or damage costs incurred either indirect or consequential.
4. Cost of removal, replacement, and/or travelling time.
5. Any modification to the product from its original supplied operation design.
6. Plated finishes deterioration under some climatic conditions or chemical environment are exempt from this guarantee.

Miles Nelson Manufacturing Ltd reserves the right to determine whether or not any fault is caused by defects in workmanship or that any product is defective. Product specification and design improvement may change as a result of our continued commitment to quality, materials and development program. Consumer Guarantees act does not apply.

The lifetime warranty covers the integrity of the product(s) base material and as such the product is guaranteed to be free from material defects for the lifetime of the product.

The product finish is subject to the same conditions that apply to the 5 year warranty, as above.

There are two types of stainless steel commonly used in the hardware industry, 304 grade and 316 (marine) grade. 316 grade stainless has molybdenum as an additive that improves its resistance to pitting and corrosion and should be used when exposed to seaside conditions.

With a little bit of care you can minimise, if not prevent tea staining and get years of visual enjoyment from your stainless steel.

Tea staining can be described as: discolouration of the surface of stainless steel that does not affect the structural integrity or the longevity of the material. Tea staining of stainless steels occurs most commonly in coastal areas and becomes progressively worse the closer you get to water (note that most of New Zealand is considered a coastal area). Other factors such as pollution, higher temperatures and humidity can also increase the effect.

To prevent tea staining, perform regular maintenance – Wash regularly with clean fresh water, mild detergent and a cloth or soft brush. After washing rinse in clean water and wipe the surface dry with a soft absorbent cloth remembering to go with the grain on brushed stainless steel. Generally, you should wash your stainless steel every time you wash your windows or every three months. Do not use abrasive cleaners or a scouring pad of any type as they may cause excessive wear and dull the finish.

## Copper Maintenance

While copper is extremely aesthetically pleasing, it also has an inherent ability to kill a wide range of harmful microbes relatively rapidly – often within two hours or less which makes it the perfect metal to use on a door with a lot of use. This plus its durability makes it perfectly suited to New Zealand's coastal environment and will last a lifetime. The natural tendency of the 100% hand finished pure copper is to show its perfect imperfections, a realness that will age organically over time. This ageing process can give a sense of life and history to the hardware.

Over time the surface may deteriorate if exposed to adverse atmospheric conditions caused by sea, air and weather. Finish deterioration caused by exposure to adverse atmospheric conditions or occurring from the use of paints, solvents, acid cleaners or scratching from keys is not considered a defect in the finish and is not covered by the warranty conditions.

However, if the “as new” look is desired, then maintenance with an approved cleaner will ensure the mirror finish will always be maintained.

Clean regularly using Brasso or something similar with a soft cloth or soft brush. Do not use abrasive cleaners or a scouring pad of any type as they may cause excessive wear and dull the finish.

# Entrance Handles

Entrance handles help create the first impression for your home and are a daily touch point that welcomes you and your guests. Whether your entrance blends seamlessly with your chosen design or makes a statement, our comprehensive range provides a selection of entrance options to match. From the latest in digital technology through to classic stylish designs, there is a look to complement or update any home.

# Door Handles

Door handles are one of the most important pieces of hardware in your home. One of the few pieces we use everyday. Not only should they complement the design of your home, they should be durable, ergonomic and functional.

No matter what your choice of finish is whether it be striking matt black, timeless satin chrome or anything in between. You can be rest assured that our range of quality manufactured handles will not only look great but will also stand up well to years of everyday use.

# S Range Lever Handles

Featuring contemporary lever designs combined with advanced engineering and quality manufacturing, the S range is the perfect retrofit or new home option. The range comes standard with a round rosette, a matching square rosette is also available as an accessory, along with square and round deadbolts.

## S Range Lever Handle Features

- Manufactured to grade 3 standard
- To fit 54mm hole
- Ideal for retro fits
- Easy DIY installation/retrofit
- Privacy set – auto release function is activated by depressing the inside handle
- Privacy button on rose
- 65mm round rose
- Suits door thickness: 32-45mm
- Comes with adjustable 60/70mm backset tubular latch
- Non-handed
- Dummy – surface mount fixed
- Suitable for back to back installation (No taylor spindle required)
- 8mm spindle
- Pressure zinc die cast
- Concealed fixing
- Fixings supplied
- Features a unique through door interlocking system that greatly improves torsional rigidity and ease of installation. Top and bottom grip points significantly reduce the risk of racking or lateral movement which can cause door damage and decreased product life. Positioning lugs inside the covers increase installation accuracy and stop potential twisting of the cover.

**10** YEAR  
MECHANICAL  
WARRANTY

# Door Stops

Our comprehensive range of door stops includes latching, magnetic or door holding options which are available in wall, floor or centre door mounting versions. There are also heavy duty latching door stops that are suitable for securing external doors. When selecting a door stop, consider the location, size and weight of the door. The area of the house it will be used in, and whether the door needs to be fastened back for safety or convenience. The finish of the door stop should ideally match the door hardware.

Additional considerations are the depth of the door handle, the thickness of the skirting board and the height of the carpet when choosing the correct length of door stop for your project.

# Bannister Brackets

One of New Zealand's leading suppliers of bannister and handrail brackets, Miles Nelson offers a wide range in zinc, brass and stainless steel for domestic and commercial installations. The range also features the Lumos® LED Handrail Brackets, designed for interior or exterior home or commercial ambient, night or safety lighting in stairways, walkways and entrance ways. The revolutionary Lumos® LED bannister bracket seamlessly blends function and design by providing lighting within the bracket body.

# Lumos® Bannister Brackets

**The revolutionary Lumos® LED bannister bracket seamlessly blends function and design by providing lighting within a bannister or railing bracket body.**

This development simplifies the installation of safety or railing illumination into one stylish bracket.

The brackets use low energy consumption LED bulbs with a life of approximately 12 years under continuous use. The light does not produce heat and is therefore safe to touch. Recommended

bracket spacing is 900mm, as light coverage area at maximum height is 900mm. One transformer can power up to 16 brackets containing LEDs.

Requires the use of a Miles Nelson regulated power transformer, supplied separately. Complies with BIA acceptable solution D1/AS1. Can also be used with photosensitive sensors for night lighting.

Lumos Brackets are designed and manufactured in New Zealand.

- Lumos® bannister bracket
- 12 volt LED downlight
- Very low power consumption
- Cool running
- Adapter for flat profile rails
- Concealed fixing
- Fixings supplied
